The basic interface will list the available contact information for a company, but not all the details that might be included in the listings. Before accessing the website, users need to enter their valid password and choose from a few selection fields. Select the required search criteria and build your own query While in the search results window, users can explore each company entry by either previewing the address or selecting an image. This is when the application will transform into an image viewer. The interface will be automatically resized and allow users to view all the details that might be available. In case the image itself is too large, users will be provided with a link that will open a separate window where the image can be resized. Ask for business information directly from the application People will be able to easily and directly access the Yellow Pages archive from the main program window and enter the required search criteria. They can choose to have the results displayed in realtime or when the search is complete. They will then be able to stop the process or take a closer look at the results. The latter action will highlight all the listed records and allow users to delete those that are unnecessary. The results can then be exported for further processing and one can select the desired export format. The main window of the application will then display the highlighted records together with the required info and an export link. One can choose to have the obtained information emailed to them as soon as the process is complete. Yello for Canada Professional Edition is a reliable tool that will enable users to extract business information from the popular Yellow Pages website, that might be of interest for them. People will be able to enjoy an easy handling and faster access to the needed info. #### What's New In?

Attention: due to possible changes to their infrastructures, including possible mobile service outages, T-Mobile US may or may not continue to support their old mobile numbers. While a new T-Mobile number may be available in your area, make sure you do not rely on your old number if you are not able to access the new system or it to keep communicating with you. If you prefer to keep your number with T-Mobile and are interested in the new number, you may provide a new number and keep your old one. If you would like to keep your old number with a limited number of calls in your account, you may consider saving the old number in your account with T-Mobile. Please continue reading and carefully review the number porting information provided by T-Mobile, for further details on this subject. T-Mobile's new number system has now been deployed nationally across the USA. The new system includes a new number, a new voice mail system and a new text messaging system. The old system includes a new voice mail system. Note: If you have trouble setting up your new number, follow the steps below. You may still receive calls to your old number when using this method. Visit the number porting page at on a PC using a computer. Click the Settings tab. In the Number porting information section, enter your T-Mobile number (old and new). Click Save. When you are ready to send or receive calls, enter the new T-Mobile number on your phone. If you received calls to your old number when using a computer, follow the steps below: Visit the number porting page at on a PC using a computer. Click the Settings tab. In the Number porting information section, enter your T-Mobile number (old and new). Click Save. When you are ready to send or receive calls, enter the new T-Mobile number on your phone. Please confirm your T-Mobile number and phone type Only T-Mobile customers with a T-Mobile Phone and T-Mobile service may request this service. If your request relates to changing the number you can still keep your old number. NOTE: As the new numbers are not being ported for all customers T-Mobile cannot guarantee that you can receive calls at the new number.

---

**System Requirements:**

Supported Platforms: Windows 7/Vista/XP Apple Macintosh OS X 10.6 (Snow Leopard), 10.7 (Lion) Mac OS X 10.8 (Mountain Lion) and Mac OS X 10.9 (Mavericks) You are going to need a compatible internet connection and power supply to run the game.
